

W 350 S Safety and performance

Flexibility in packaging size of single coffee packs
and multi-packs.

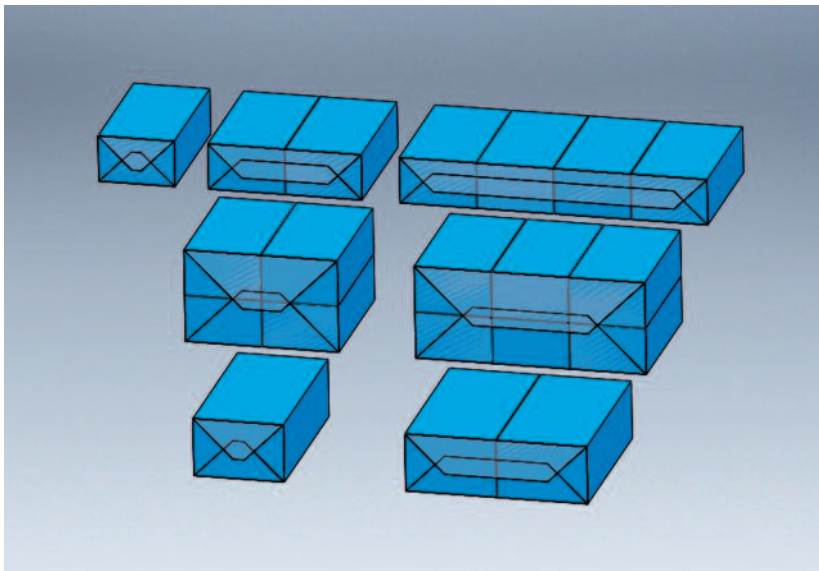

W350S

Design features

Solid tubular frame with central working plane at an ergonomic working height of ca. 800 mm. The machine is driven by a central vertical shaft with cam disks. Product feed is effected in line. Film rolls may be placed inside or outside the machine paneling. The safety paneling consists of 15 mm thick hinged doors made of Makrolon, including safety checks. Painting of the machine is done according to the customer's request.

Formats

3D packing formats.

Roll stand, which can be positioned either in line with or transversely to the conveying direction.

Additional Options

- Separate roll stand to hold a jumbo roll with a diameter of 800mm
- Tilting station for single packs at the machine infeed
- Erecting station for product sets at the machine exit
